Internal Review and Recommendations

PA Brine Treatment and its sister company, Hart Resource Technologies, Inc. are merging to form Aquatech Fluid Recovery Services, LLC. This transfer is solely a change of ownership. Therefore, no other changes are being proposed to the current permit.

Minor changes that appear on the transferred permit include the entering of an EPA address on Page 7 of the NPDES permit for reporting requirements. The other minor modification is the removal of the interim limits that were previously on page 2 of the permit and corresponding referenced flow rate under "Supplemental Information" on current page 3 of the NPDES Permit. The final limits were to become effective upon the treatment plant being re-rated or modified to operate at the proposed increased discharge rate. The treatment plant was re-rated through a WQM Permit amendment issued 10/23/2009, and the construction for the modifications was completed on 9/23/2010 according to the post construction certification form.

It is recommended that these permits be issued.
